

SPYING (injected) pony OR
CONTROLLING WHO RECEIVES

⇒ Who or What is this threat coming from? (that this VPN had to be put in place)

≈ VPN TELEPATHY

- (assumed)
- my own AI is able to do \approx speech synthesis, giving thought before they go into own externalizing speech center of my brain
 - VR is able to temporarily take over AI (coll. para)
 - ↳ allows sensing other persons intent but not much more beyond intention
 - ↳ followed by garbling messages (usually)
 - inner monologue is used instead of speech center of brain to output to other via AI

Q) Why is Ulipathy not limited to / - ~~Reading~~ / centers of the brain.
- Speech
which would also be enough for - monologues
- injection of AI voices

⇒ So the big Question: Why let AI / speech / instead of me?
pit into words

⇒ Why this apparent need to bypass speech center of the brain?

! 2 WAYS of communicating / Ultrapathways /
↳ is different hardware: / speech & auditive
↳ Injection in inner monologue

↳ hears - deane group (muscles & manipulators) / overloaded
/ speech & auditive
/ SENSORIAL
↳ thinking group (hands to manipulate) - even in overload
/ compensated in
/ other center
/ SENSORIAL BYPASS
