Work in Progress
Not for Distribution

Alight
HR experience

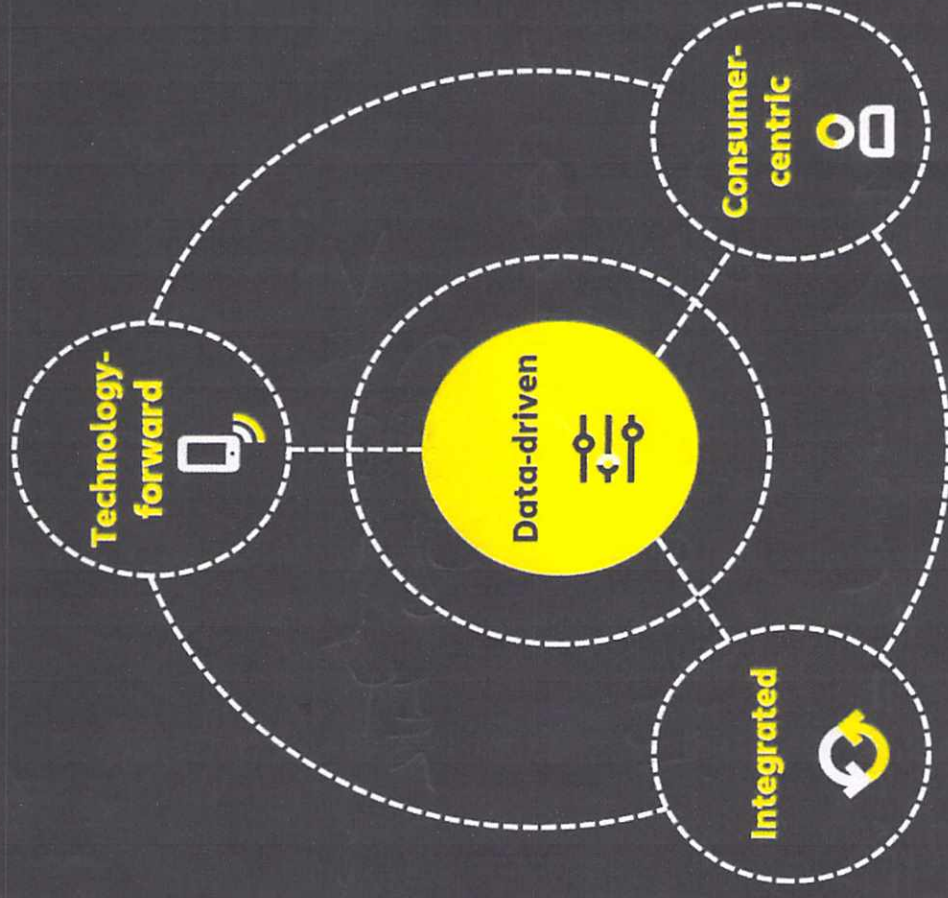

Planning + Roadmap

→ Forward long → should stand with the device - looking
— not limited to the information gathering
ledge.

Our vision

We are committed to a **technology-forward**, **consumer-centric** and **integrated** experience powered by **data-driven** insights for our clients and their people.

We bring our solutions together for our clients to help them get the most out of their human capital strategies. And, we create a seamless experience for our clients' people to help them make the best health, wealth and career decisions for themselves and their families.

> *Memoranda* : sounds like a "skid" name to me
(cloning) HIR

Sank's America

With technology as our catalyst and humanity at our core, we are reimagining how people and organizations thrive.

- Sparking new possibilities. Illuminating new efficiencies. Simplifying how people work.
- People-centric service. Combining human understanding and cutting-edge technology.
- Committed to excellence every day. Because every detail matters.
- More efficiency. More flexibility. More security.
- Consumer-centric. Data Driven. Integrated.

We enable people to do their best work. In a simpler way. A more connected way. A more insightful way.

alight

With technology that is as fast as the speed of light, we are now able to process data at a much faster rate than ever before.

- More efficient: Data is processed faster and more accurately than ever before.
- Consumer-centric: Data is used to improve the customer experience.
- Personalized service: Data is used to tailor services to individual customers.
- Predictive analytics: Data is used to predict future trends and behaviors.

More efficient: Data is processed faster and more accurately than ever before.

Consumer-centric: Data is used to improve the customer experience.

Case Study

Q> I.P.R.:

Q> increasing (??)

- Also increased = in-
creased
pattern & etc

we asked to sell a
product. -> it's directly
in front
of

- My conclusion!

Corporate objective

5% organic growth for Payroll & Cloud Solutions, on a baseline of ~\$1B sales (NA ~0.6B, EMEA ~\$0.4B)

Critical priorities

Drive the product and innovation strategies across Alight's Payroll & Cloud Solutions line:

- Productize Alight's IPR layer around Workday and SAP SuccessFactors
- Portfolio evolution to stay relevant and competitive, and break the plateau on our traditional business proposition

Set the strategy and roadmap (decide which features and functionality to include), and develop/deliver the product/service

Initiatives and challenges

- **Productize and integrate legacy Alight tools** that constitute its differentiating IPR built around Workday and SAP SuccessFactors
 - Make it scalable, robust with the right quality, and develop missing capabilities
- **Evolve Alight's Payroll & Cloud portfolio:** innovate to break the commodity trap, build a future-proof product/service with clear differentiators
 - Capture the opportunity of a more comprehensive workforce scope that includes both employees and contingents such as contractors, freelancers and other "gig" workers—in a context where the traditional payroll volumes are declining
 - Deliver services to contractors and freelancers as part of employer value and brand in the war for talent
 - Serve a globally mobile workforce
 - While staying compliant with evolving data handling and privacy requirements
- **Evolve product/service capabilities and tackle technical challenges,** e.g.
 - Deployment of augmented intelligence through NLP/ML algorithms in contact centers: Which combinations are most important? How do you set up a framework to rapidly evolve those algorithms?
 - How to containerize applications?

 ~~$\text{H}^+\text{O}^- + \text{I}^- \rightarrow \text{I}^-$~~

What is it?	Vision	What does it do today?	Maturity
Eloise	Payroll control center tool powered by AI where clients have visibility to their payroll details, processing progress and anomalies that, if resolved, will help to control payroll leakage	AI Powered payroll anomaly detection / prevention	- In development - Pilot underway
Benefit Payment Services (BPS)	Payroll system and service to support our Pension Administration business clients who were in need of a benefit payment service.	Pensioner Payroll on PeopleSoft	24 clients with > 620k pensioners
O2 Mass Load Tool	Intuitive self-service experience for customers to complete their mass loads with built in data quality validations to limit the introduction of bad data into the HR platform. Allowing an expanded opportunity for more people at Client to support mass load than HR system security would allow.	Customer self-service tool for loading data into Workday	- Supports 12 processes – most used are Job Change and One Time Payments. - Currently used on 2 large clients (Bank of Montreal, Bank of America & Goodyear due to ROI)
O2 Severance Tool	End to end self-service severance solution in a single tool tightly integrated with the HCM platform, designed to accommodate all client severance requirements, as well as functionality not typically delivered in the core HR system. (modeling, selection, reporting, document generation, document tracking, etc.)	Severance processing	Mature product used on our large clients with high volumes of severance (HIG, Prudential, BMO, CIBC, Amex)
O2 Overpayment Tool	Provide clients with a service to track, chase, collect and manage overpayment activity which is not currently supported in the core payroll system today, thereby helping them reduce payroll leakage.	Overpayment management/collection	- High volume overpayment customers - BOA, BMO, PRU, CIBC, Goodyear, Thomson Reuters, CVS all have live today
O2 HCM Connect Portal	Landing page for non-Upoint customers to find all Alight tools and products in one location including customer care tools.	Skinny portal for non-Upoint clients, enabling access to customer care tools and eventually O2 products	- In Progress, not live - First client Mar '20)
O2 LOA	A tool to house the business rules related to the Administration of client LOA processes which would allow for automation of manual steps, reduction of effort and errors, increase quality and process adherence, provide advanced reporting capabilities and improve the customer experience by creating a UI that will allow employees to upload documentation rather than mail/fax.	LOA tracking (CRM) and task management tool.	- IN development - Required for Marriott scope. - Expected use across other clients.
Alight Garnishment Tool (AGT)	End to End garnishment and third party payment management tool supporting the process from intake of orders through to payments to third parties with a front end portal servicing employers (document upload and download, status and reporting capabilities) as well as employees (view and status).	Intake of the third-party payments & garnishment requests / tax levies, and sends payments taken from payroll out to third parties.	70 clients by 1/1/20 85k garn deductions annually 84k interrogatories annually 7k new correspondence (September as example) >\$228M annual payments madex
HR Analyzer	Customer facing analytics tool designed to surface the data that would allow Alight colleagues to consult our clients with meaningful insights into operational data(blending Hr transactional data with our Alight interaction data) to help them drive better business outcomes.	- Client facing analytics tool - Focuses on delivery data	Built, live for 2 clients
TFSS Portal	Allows clients to see funding requests, total tax dollars deposited, number of returns, etc. while also giving them access to their returns and any assessments/notices we have received on their behalf.	Front end portal (to connect to Master Tax) for Tax Filing Shared Service (internal and external)	Currently in initial design and creation
IDB	Single source of truth system that will house all pertinent project information and the central decision support system for the operational and tactical level needs of AMS & CDS. Tracks all client contracts, work, project resources, discovery documentation and project statuses., with external client facing view for clients to approve, document and review information, requirements, etc.	Tracks all client contracts, work, project resources, discovery documentation and project statuses	Used by > 2000 users today across many LOB's
BSA	A tool that will increase the data quality and efficiency of converting data from a legacy ERP into Workday by utilizing predefined algorithms to cleanse, identify gaps or deltas, as well as correct data issues identified, then push the clean data into Workday via web services.	Conversion of a legacy ERP into Workday tenant	- Largest client to date converted over 35 million rows of data for 900,000 workers - Identified +5 million data errors within a few hours

Productization and Prioritization

In Flight	High Priority (Productize -> Move to L-NGA)	Low Priority (Future Productize, stay w/ L-Alight, then move the L-NGA)	Other
- Lisa - Eloise	Overpayment Tool (O2) 7 live clients, 5 In Progress 35 p/m is currently the minimum to put someone on the tool - Opportunity for all NGA NA Clients - Biggest cross sell opportunity w/ revenue, buy up service for NGA clients - Opportunity: More automated, streamlined, for all clients, not only those with higher volume - Limited/no core solution, client specific Tax Filing (TFSS), NA only - ALL (Alight NA Pay clients) live - Opportunity for all NGA NA Clients - Opportunity to drive down impl. cost Required to stay competitive - Is not today an application, WIP Garnishments (AGT), NA only - ALL (Alight NA Pay clients) live - Opportunity for all NGA NA Clients - Opportunity to automate, drive down impl. cost - Opportunity to go global; needs non-NA input - Currently linked to Upoint - Needs rebuild to move off Liferay	Mass Load Tool (O2), Workday only 3 live clients - Needs rebuild - Extend to include hrX - Too expensive to fully leverage as is - Hold on putting add'l clients on tool Severance Tool (O2) 5 live clients - Limited clients fitting profile - Very expensive, needs high volume - Only needed when needs exceed what is available in HCM - Is today a big effort to stand up, needs to be standardize - Needs to be client configurable, not alight teams doing coding - Tied to HR/DQM services (feeds Payroll) / Alight only LOA (O2) 1 client In Progress - Client specific development for Marriott - Potential for State Street, SoT - Eliminate e-Case	Phase Out - BPS: Long-term vision to replace with Orion - HCM Connect: Replace with hrX Access by 2022 Owned by Delivery - HR Analyzer - IDB - BSA

BPaaS Summary

All tools need investment to be Easy to turn on, activate, cost effective, turn key, client configuration.

Is today a big effort to stand up, needs to be standardized. Solutions need to be client configurable, not Alight teams doing coding.

Internal vs. External needs

Tool	Internal Need	External Need
O2 Mass Load Tool		
O2 Severance Tool		
O2 Overpayment Tool		
O2 HCM Connect Portal		
O2 LOA		
Allight Garnishment Tool (AGT)		
TFSS Portal		

→ Using our products for our HR is NOT ethical!

C

C

Customer Base

Higher Priority

- Payroll complimentary
- Largest joint customer base / Opportunity
- Revenue driving

Tool	Impl Cost	Annual Ong Cost (tech only)	Volume / ROI	Clients	ESS/HRSS	Considerations
Overpayment Tool (O2)	\$45k - \$55k (base - WD)	\$19k - \$25k (base - WD)	35 OP's per month	7 live 5 IP	ESS - In progress HRSS - Planned Admin Tool - live	- Biggest cross sell opportunity w/ revenue - Buy up service for NGA clients - ThyssenKrupp and Boston Scientific
Tax Filing (TFSS)	TBD	TBD	N/A	ALL NA Pay	HRSS - Planned	- Leveraged for all NA payroll customers and moving NGA to this tool - Required to stay competitive
Garnishments (AGT)	\$7k - 10k (tech) \$29k - \$34k (ops)	\$18k - 20k (tech)	N/A	ALL NA Pay	ESS- live HRSS - live	- Leveraged for all NA payroll customers and moving NGA to this tool - Ongoing svc cost is rolled into price/check - Currently linked to Upoint - Needs rebuild / off Liferay

Proposal:

- Oversee already committed development by WiPro for back-end tools
- Apply consistent style and branding across all tools (already in progress, although looks inconsistent)
- Create summary tiles in hrX Access for Professional users, as an entry point

Lower Priority

Tool	Impl Cost	Annual Ong Cost	Volume / ROI	Clients	ESS/HRSS	Considerations
Mass Load Tool	WD - \$25k-\$30k EC - \$35k-\$41k (base / tech only)	WD -\$30k-\$40k EC - \$35k-\$41k (base / tech only)	50 EIB's per month	3 WD	HRSS - Live	- Needs rebuild - Extend to hrX - Too expensive to fully leverage as is - Hold on putting add'l clients on tool as is
Severance Tool	\$40k- \$50k (tech base – WD/OC) \$85k ops	\$17k - \$21k (tech) \$23.5k (ops)	>300 Severances annually	4 WD 1 OC	HRSS - Live	- Limited clients fitting profile - Very expensive as is - Tied to HR/DQM services (feeds Payroll) / Alight only
O2 HCM Connect	\$11,375 (tech) *SOX estimate Excl other systems	\$6775 (tech) *SOX estimate Excl other systems	N/A	2 WD	ESS	- Moving to hrX Access - Impl est incl config, translation and SSO - Ongoing est incl config, license and storage
O2 LOA	TBD	TBD	TBD	1 OC – In progress	Admin only	- One client need currently/ primarily a CRM need - Tied to HR/DQM services - Need to review using Assist

hrX (Er Enabling

ess

- Should just be BAU, not boxed in as a phase (e.g. PCC runs simulations after every data change, so why is this not available?)
- Move responsibility back to the client; data changes have an impact and here is the impact of your changes (feedback of assessments posted in Exchange – increase hrX value

- Need to focus, not be busy everywhere!

- How do we get away from from Retained Payroll role completely? Why does it need payroll expertise to sign off? Should not be required, not entertained.

Pre-payroll

Pro-actively manage data and data anomalies ahead of time

----- HR Business Partner -----

• Data Input

- Mass upload of data (O2)
- Intake
 - Severance (O2)
 - Garnishment
 - Leave of Absence

• Payroll Readiness

- Data quality
 - Data reconciliation
 - Identify missing data
 - Identify errors
 - Identify incorrect data
 - Compare different data sources

• Pay variance (PCC)

• Interfaces

- Analyze process
- Check data integrity

• Eloise:

- Anomalies in

Priority

• Take a step back

- What are the dimensions
- Isolation Forrest: Pattern in dataset that are weird
- Eloise: Patterns in individual approach that seems weird
- Policies: Compare with previous (similar to Eloise)
- A number of these things we can reconcile for ourselves e.g. salary increase
- Focused on finding more stuff to put on the list, makes more difficult/complicated, etc.
- Machine should – with a high certainty – self check
- Is probably both roles.
- Could this roll up to Eloise

communicate with impacted EEs

----- Retained Payroll -----

• Real-time payroll checklist (hrX/PCC)

- Pre-analyzed output and visual validation
- Ease of access to pay related documents (hrX)
- Visual reconciliation/file balancing
- Verify incoming payroll artifacts
- Anomalies in pay results

Post Payroll

Be informed, Be prepared

----- Retained Payroll -----

• Payroll Analytics

• Payroll Reconciliation

- Payroll funding and GL
- Tax Filing, Garns, Overpayments
 - What has been paid
 - Who was it paid to
 - Which payroll does it relate to

• Funding

- Online approval and money movement

• Administration

- Tax Filing (TFSS)
- Garnishment payments (AGT)
- Overpayment recovery (O2)

• Eloise

- Anomalies in pay results

- Should be a trace of simulations and corrections; reverse engineer – what did we find in simulation runs and how could we have flagged/detected this?
- No more lists/exceptions, deliver solutions

- Case Management, Customer Care, Lisa
 - Digital Workforce

Where we are...

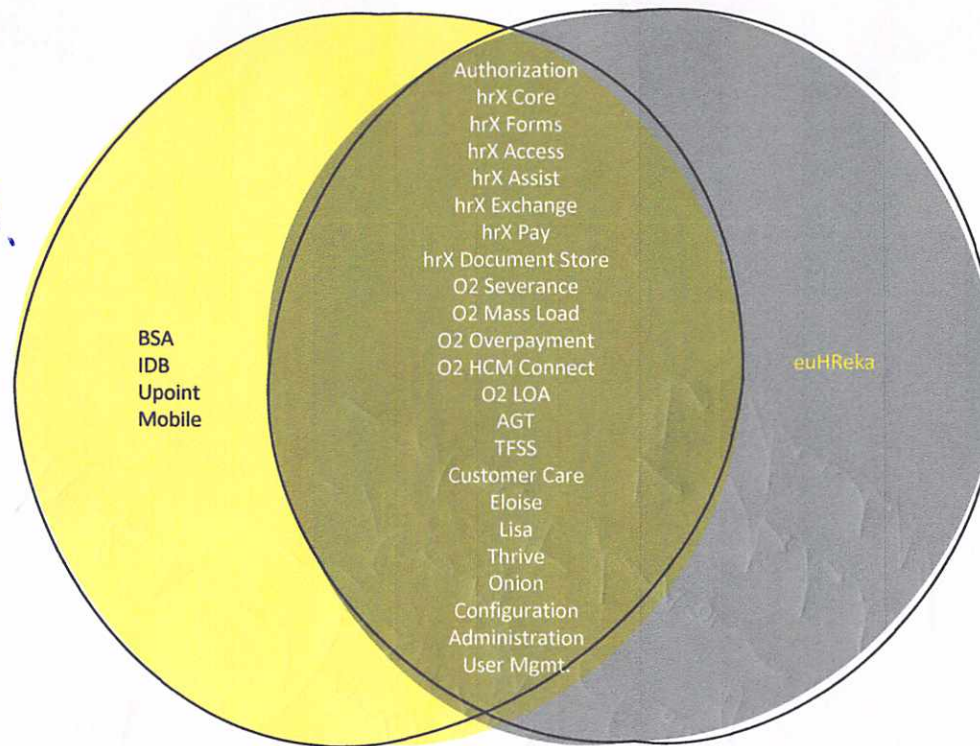

Today

2021.Q1

Where we need to be...

- **Product/service deliverability:** BPaaS helps companies facilitate the delivery of products and services in an **automated, streamlined** way with help of cloud technologies. BPaaS is **standardized** for use across industries and organizations, so it's **flexible and repeatable**, resulting in **higher efficiency** and, ultimately, better service and experience for customers.
- **Cutting edge at reduced cost:** BPaaS provides a business with the latest digital tools, technologies, processes and talent to improve its efficiency, service and the customer experience, without the **large capital investment** traditionally required. By implementing BPaaS, companies can shift to a **pay-per-use consumption model** and reduce total cost of ownership.
- **Accommodates fluctuating business needs:** BPaaS can **scale on-demand** when a company experiences a peak workload. Due to its **innate configurability** applicable across multiple business areas, and its interaction with other foundational cloud services like SaaS, the service can make use of its cloud foundation to **scale to accommodate large fluctuations** in business process needs.

Pain points & Needs

Feedback obtained from internal interviews with sales and account management – what our clients are saying

Pain points

- Continued comparison to ADP and OSV “portals”
- Outdated and fragmented technology
- Lack of detail and interaction/responsiveness
- Unable to easily reconcile payroll funding and GL
 - *“Have a heck of a time doing this with current tools available”*
 - *“We would like the ability to see what was paid, when it was paid, which payroll it relates too, and drill down into the details.”*
- Communicating a lot... but not effectively if client doesn’t understand what we’re saying
- Multiple reports are provided; clients don’t know what they’re supposed to do w/ each
 - *“Contents are gibberish”*
 - *“Does not provide “ACTIONABLE info, e.g. Next step=CLIENT you need to do XYZ”*
 - *“Some items indicate closed but may not be truly closed, the action just sits in client’s court. We need to differentiate these statuses (and the actions to take, by whom)”*

Needs (Themes)

- **Consolidated, modern** user experience
- **Seamless** experience; “One place to go”, Single entry point/overview
- **Effective, transparent** interaction w/ back office
 - The ability to raise, view, and collaborate on tickets
 - Management and oversight reporting
- The ability for Alight to **pro-actively manage** their clients
- **Real-time access to the data** being processed (reports)
- **Simple** (easy to understand), **actionable Insight** w/ the ability to drill down into the detail
- **Oversight and Reconciliation** of the end to end payroll process
 - What has been paid
 - Who was it paid to
 - Which payroll does it relate to
- A **centralized repository** of client-centric information e.g.
 - Past webinars, Prior newsletters, "Administrative Service Guide" (Roles and responsibilities of each service), Key contacts, etc.

Pain points & Needs

- Pain points**
- Continued comparison to ADP and OAS "portals"
 - Outdated and fragmented technology
 - Lack of detail and interaction/responsiveness
 - Unable to easily reconcile payroll funding and GL
 - "Have a lack of a time doing this with current tools available"
 - "We would like the ability to see what was paid, when it was paid, which payroll it relates too, and drill down into the details"
 - Communicating a lot... but not effectively if client doesn't understand what we're saying
 - Multiple reports are provided; clients don't know what they're supposed to do w/ each one
 - "Contents are gibberish"
 - "Does not provide ACTIONABLE info, e.g. Next step=CLIENT you need to do X/Y/Z"
 - "Some items indicate closed but may not be truly closed, the action just sits in client's court. We need to differentiate these statuses (and the actions to take by whom)"

- Needs (Themes)**
- Consolidated, modern user experience
 - Seamless experience: "One place to go," single entry point/overview
 - Effective, transparent interaction w/ back office
 - The ability to raise, view, and collaborate on tickets
 - Management and oversight reporting
 - The ability for Allight to pro-actively manage their clients
 - Real-time access to the data being processed (reports)
 - Simple (easy to understand), actionable insight w/ the ability to drill down into the detail
 - Oversight and Reconciliation of the end to end payroll process
 - What has been paid
 - Who was it paid to
 - Which payroll does it relate to
 - A centralized repository of client-centric information e.g.
 - Past webinars, prior newsletters, "Administrative Service Guide" (Roles and responsibilities of each service), key contacts, etc.

Themes

Theme	Action(s)
Consolidated, modern user experience Seamless experience; "One place to go", Single entry point/overview	• hrX Identity + hrX Access as the landing page for all Payroll & Cloud tools • Standardize user experience (Thrive) across all tools and/or re-build client experience in hrX (where necessary) • Identify functionality within L-Alight that can be used more broadly across either L-Alight or L-NGA tools • Build/Centralize/Re-build/Package core components that can be used (now or later) across the suite: Users, User Settings, Administration, Configuration, TSL, Safebox, Worklist, Employee Profile (lite), Document upload/store/library/gen., Forms, Help Center, <i>Search (new)</i>, <i>Notifications (new)</i>, <i>Favorites (new)</i> • Update L-Alight tools to use core components, sunset any L-Alight duplicate functionality • Create a "Home" page in hrX Access which will contain tiles for each application a non-EE user has access to (default page for non-Ees) • Create Tiles for Exchange and Pay + L-Alight modules • Later transition to streamlined, simple & intuitive home page; No tiles (but re-use tile contents) • Rename "Access" to "Myself" which will continue to contain My Payslip, My Docs, My Forms, My Tickets, etc. • Add intake options from L-Alight to hrX Access for Employees, hrX Pay for Retained Payroll, and hrX Exchange for HR BP • Create personalized experiences: • HR VP View: Global, statistical view (default landing page for anyone with VP role) • "Myself" landing page (default landing page for all employees) • Retained payroll view in hrX Pay; build around PPM checklist and tasks • HR BP view in hrX Exchange; build simple overlay to navigate users -> no need to use Integration tab! • Worklist 2.0 with extended functionality so that it's a centralized inbox across all Payroll & Cloud tools (can also integrate w/ HCM...) • Employee Profile 2.0: Simple, easy to view and update (can be made "lite" and re-used as part of hrX People) • Make hrX centralized hub for standardized data exchange for P&C tools (e.g. demographic data feeds); centralize/simplify data quality • Embed Lisa into hrX Access • Integrate with Alight Total Rewards (ATR) to provide total reward statement
Simple (easy to understand), actionable Insight w/ the ability to drill down into the detail	• Keep it simple and choose most relevant indicators (per role); Define data needs for each role/persona • Define/Create one tile per tool, containing key (5?) indicators for the role that uses them. Make available on "Home" page • Answer common questions via tile content to prevent the need to take any further action • Transition tiles into simple, intuitive landing page, avoiding clutter, increasing visual appeal, reducing decision making
Real-time access to the data being <u>processed</u> (reports)	• Review content of existing reports and eradicate "gibberish" content; Streamline and simplify reporting • Single document storage solution across the whole suite with built in filtering/grouping of documents for ease of access • Add Corporate Docs view; consolidation of all documents from all systems (API retrieval, e.g. corporate documents attached to tickets) • Ability for users to tag approved TSL users (user receives notification w/ link to doc.), or share with approved TSL users (user receives link via safebox to copy of doc.) • Ability for users to be notified when new documents (or certain document types) are posted

What insight want?

What do bands do??!

Themes

Theme	Action(s)
Effective, transparent interaction w/ back office The ability to raise, view, and collaborate on tickets Management and oversight reporting	• Roll out of hrX Assist across Alight
The ability for Alight to pro-actively manage their clients	

27
L. Aug
Cult cells from product.

25m01T

Themes

Theme	Action(s)
Enabling the End to End payroll process	• Intake • Add hrX to Mass Upload tool • Consolidate Severance, Garnishment, LOA intake into hrX Pay • Data Quality (Ready for Payroll) • Build data reconciliation for key fields between HCM and euHReka (compare in hrX) • Finalize/package hrX validation framework (N% of common errors detected) • Visualize SAP PCC exception report in hrX Pay in near-real-time (currently Excel output, on demand) • Expand Eloise to look at master data anomalies • Add above output into Worklist • Pro-Active Measures • Package compliance updates from help center and pro-actively push as notification incl. quick analysis of impacted population(s) • Payroll Processing • ALL periodic content linked to PPM checklist (see retained payroll view) • Visualize payroll variance with simple links to EE Profile for investigation (e.g. history of changes since last payroll) • Visual balancing across payroll and payroll artifacts through simple view • Embed Eloise (or Eloise output) into hrX Pay • Reconciliation (see Oversight and Reconciliation)
Oversight and Reconciliation of the end to end payroll process What has been paid Who was it paid to Which payroll does it relate to	• Review euHReka SOC1 report, determine how this can be complimented by L-Alight data • Build framework in hrX Pay to consume euHReka SOC1 report + L-Alight data • Should work stand-alone or with extended L-Alight data (one or multiple) • More modules enabled/data available, the more comprehensive the reconciliation • Visualize content in online reconciliation w/ drill down (via PPM step) • Include troubleshooting tool(s) • Simple, visual, intuitive • Embed Eloise into hrX Pay
A centralized repository of client-centric information e.g. Past webinars, Prior newsletters, "Administrative Service Guide" (Roles and responsibilities of each service), Key contacts, etc.	• Expand Help Center content to cover L-Alight toolset • Embed Help Center within L-Alight toolset • Expand SDA content to cover L-Alight toolset • Look at how to include Webinars, Prior newsletters, etc. (and if this can be applied to L-NGA toolset)

UX: Peeling back the Layers

How far do we Thrive in hrX?

- Employee View: Color Palette only w/ hrX structure
- Specialist View: Color Palette only w/ hrX structure
- Rich Application: Color Palette only w/ common guidelines

- No roles are assigned by default. Any user added (that is not auto-created via a hiring event – see below) will have no access to any functionality or data, unless a role is otherwise assigned.
- Person(s) that are hired into hrX will automatically be assigned the employee role; A simplified view that provides insight into only their own personal situation -- Payslips, Local Data, Tickets, etc. This view applies to all people hired; employees, contingent workers, pensioners, etc.
- For Select users with the need of extended capabilities, e.g. Center of Excellence, the client will allocate specialist roles, via the TSL and/or through role assignments in their HCM platform (integrated with hrX). Specialist user will see light views for specialist tools. The light view provides transparent, actionable information and allows for the completion of basic, common tasks only. The light view is available on all platforms.
- When more detailed and complex tasks need to be completed, and where the user has sufficient roles assigned, the user will be navigated to a tab in their web browser and the underlying tool that is specialized for this purpose. This view will be consistent with that of internal users/super users to avoid an extra tier of UI development.

Client Roles & Needs

Roles ignored:

- Benefits (fully Upoint or HCM)
- Compensation, Talents, Learning, Performance (fully HCM)

Is today considered as a generic "HR Administrator" in NGA

Employee	Manager	Center or Excellence		
Employee • Ask Lisa • Contact us • View/edit tickets • View / edit data • View payslip • View/Upload documents • SSO to 3rd party platform • Check garnishment status • Re-pay overpayments • Request Leaves • View Total Reward Statement • View/maintain Benefits	Manager • Approvals • Time • Performance reviews • Compensation reviews • Bonus • Salary	Payroll <i>Payroll Manager; Payroll knowledgeable; Strategic, not transactional</i> • Approve funding • Manage escalations • Approve Exceptions • Tax Filing • Garnishments • Overpayments • Payroll Reporting • Compliance updates • Is payroll on time • ACH file delivered • Off Cycles • Payroll accuracy • Eloise • Analytics	HR Director <i>Strategic, not transactional</i> • LoA • Severance • Modeling • Dates • Details • Analytics • Employment laws and regulations	HR Business Partner <i>Transactional; Could be Global and/or Local</i> • Data input / management • HR • Benefits • Comp • Talent • Learning • Performance • Mass Uploads
• hrX Access / Upoint • AGT • Overpayments • LOA	• hrX Access	• hrX Access • hrX Pay • TFSS • AGT • Overpayments • Help Center • hrX Analyze	• hrX Access • hrX Analyze • LOA • Severance	• hrX Access • hrX Exchange • hrX Pay

How do we make this role obsolete over time?

[illegible]

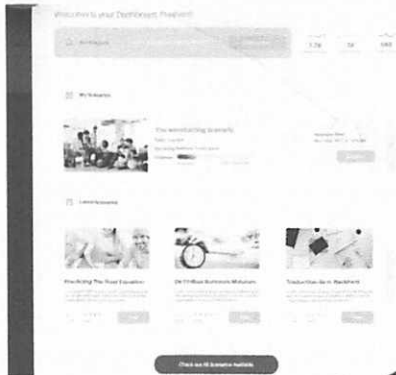

What do these users need?

- **VP of HR** – No need to know a thing about payroll. BUT they **need payroll data**! Most important will be **SIB costs** (base salary vs. full SIB where it includes full Employer cost of salary incentive and benefits per geography), **trend in payroll cost within a year** (for example if we pay annual bonuses in March there will be a significant increase in payment amount which will then “return to normal”). They may be interested to **compare cost of salaries for the same job functions between geographies** (how much cost their Associate level payroll team in Poland vs Kuala Lumpur/Kochi). If we can also pull out absence information based on the payslip entries they could also benefit from **understanding absence dynamics** – how many days lost due to an absence, cost of absence (if same as FTE or budget neutral as covered through local social security).
- **HR Business Partner** – if you perceive HRBP as the strategic role, it will be fairly the same as VP of HR. If you perceive them more of HR Generalist role, they may be more interested in **regulations**, but also **payroll accuracy**, **number/type of changes processed in the month**, **number/type of colleague queries** etc. Both groups may also want to have information about **payroll cut-off date** for a month per geography, so they know if they still can request a job change or one time payment to be processed with the nearest payroll or not.
- **Payroll team** – staying up to date with **important dates**, **regulatory changes** etc. practical knowledge of **payroll calendar**, **changes to be reviewed/processed** in the nearest payroll run, **exceptions**, etc.

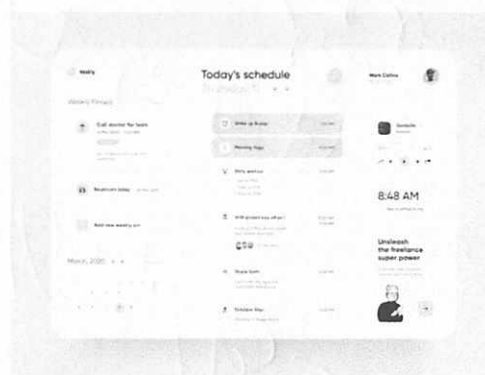

Single Entry Point. Personalized Experience.

hrX Access Portal for Professional Users (Future Proposed)

- Single entry point
- Same view for all non-EE+non-VP users, focused on key data elements per role
- Statistics tailored per role of:
 - HR VP / Director (TCO)
 - HR BP (Transactional)
 - Retained Payroll (Payroll Recon.)
- Transform tile data into main content; Simple and Intuitive
- Change statistics to another of pre-available options

Focus on pre-defined dashboard but with vision this could be customized (but not today!)

- Practical knowledge of payroll calendar, changes to be reviewed/processed in the nearest payroll run, exceptions, etc.

Personalized Views... For Retained Payroll

- Staying up to date with important dates, regulatory changes etc.
- Practical knowledge of payroll calendar, changes to be reviewed/processed in the nearest payroll run, exceptions, etc.

The screenshot shows a mobile application interface for payroll management. At the top, there's a header with a user profile (Mark Collins), a toggle for 'Today's schedule' (Thursday 11), and a 'Weekly Pinned' section. Below this, there are several sections: 'Completed PPM Tasks, minimized' (showing 'Wake up Buddy' at 7:00 AM and 'Morning Yoga' at 8:00 AM), 'To Do / In-Progress PPM Tasks, expanded' (showing 'Daily workout' at 9:00 AM), and a 'Simple view of key dates on the calendar' (showing a calendar for March 2020). On the right side, there's a 'World Clock' showing times for various cities (London, Mumbai, Hyderabad, Brussels, Portland, Manila) and a 'Lisa, Pro-active Virtual Assistant' icon. A 'User profile for personalization' callout points to the top left. A 'Toggle by pay group, or daily view' callout points to the 'Today's schedule' toggle. A 'Highlights, e.g. things you need to know, such as compliance updates, payroll system, or personal reminders, payroll cut-off dates' callout points to the 'Weekly Pinned' section. A 'Completed PPM Tasks, minimized' callout points to the 'Wake up Buddy' task. A 'To Do / In-Progress PPM Tasks, expanded' callout points to the 'Daily workout' task. A 'Simple view of key dates on the calendar' callout points to the calendar view. A 'PPM Checklist; Shows progress, actionable steps to be executed w/ due date/time, and ease of access to documentation (for completed steps). Actions such as reconciliation, administration, funding, etc. would be steps within this process.' callout points to the 'Shift project kick off pt.1' task. A 'User profile for personalization' callout points to the top left. A 'Toggle by pay group, or daily view' callout points to the 'Today's schedule' toggle. Employee Profile

Notifications

Pro-active communication; Don't force users to come and search

Make Notifications Relevant

- Short and compelling; Both interesting and useful information
- Provide value to the user and are worth the momentary interruption
- Personalized and relevant information
- Personalized push notifications have an open rate four times higher than generic
- Including imagery in push notifications can increase direct open rates by up to 56 percent.

Time Notifications

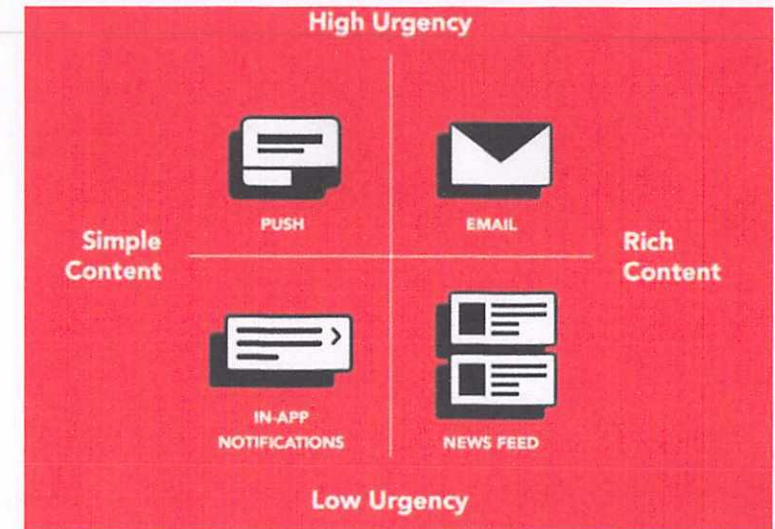

- Sending at the wrong time will increase the risk that notification will be ignored
- Avoid sending notifications when your user is asleep
- ill-timed notifications sent between 12 and 6 am risks waking up or disrupting a user
- Send notifications according to the local time zone and select the time when users are mostly engaged
- The best time to send push notifications is between 7am-10am and between 6pm-10pm

Make Notifications Actionable

- Too many notifications send in a short period of time can lead to the situation known as "notification overkill"
- Notifications should lead to the specific part of an app or site, based on the notification content

Establish a Notification Strategy

- Set a goal you want to reach with your notifications
- Every notification should be supported with a clearly defined expectation and the action we expect the recipient to take
- Measure and track notifications to determine effectiveness; do not persevere with low open rates

2nd and 3rd class fares

- Provides value to the user and are worth the money you paid

Worklist

Single go-to place for all outstanding actions

- Cross Module
- Content filtered based on role
- Searchable, filterable
- Familiar look and feel to drive efficiency
- Always date/time stamped
 - Include due date
 - Include est. on time needed to resolve
- Subject: 50 characters max. Direct, Impactful.
- Preheader: 70 characters max. Tell the user why this is useful for them. Subject line and preheader text should work together.
- All inbox items must be actionable from within the Inbox

The screenshot displays the 'Inbox' section of a software application. A dark sidebar on the left contains a 'Filter' menu with categories: TYPE (BPI, HO, VAT, FISCAL, INCASARE, HFINANTE, AEGRM, RECOM, FILES, MEETINGS), STATE (RECEIVED, WITH STAR, IMPORTANT, DELETED), and TIME PERIOD (ALL, TODAY, YESTERDAY). The main area shows a list of messages, with the first one from 'S.C Dedeman SRL' dated Tuesday, 28/June/2016. A search bar at the top right is labeled 'Search'. A blue callout points to the 'Filter' menu, another to the 'ALL | INCOMPLETE' filter tabs, and a third to the 'Actionable' status of the first message. A fourth callout points to the 'hrX Module (Sender)' in the message details. On the right, there are two charts: 'Fiscal value' (a line graph for years 2008, 2009, 2010) and 'Employees' (a bar chart for years 2008, 2009, 2010).

Tiles

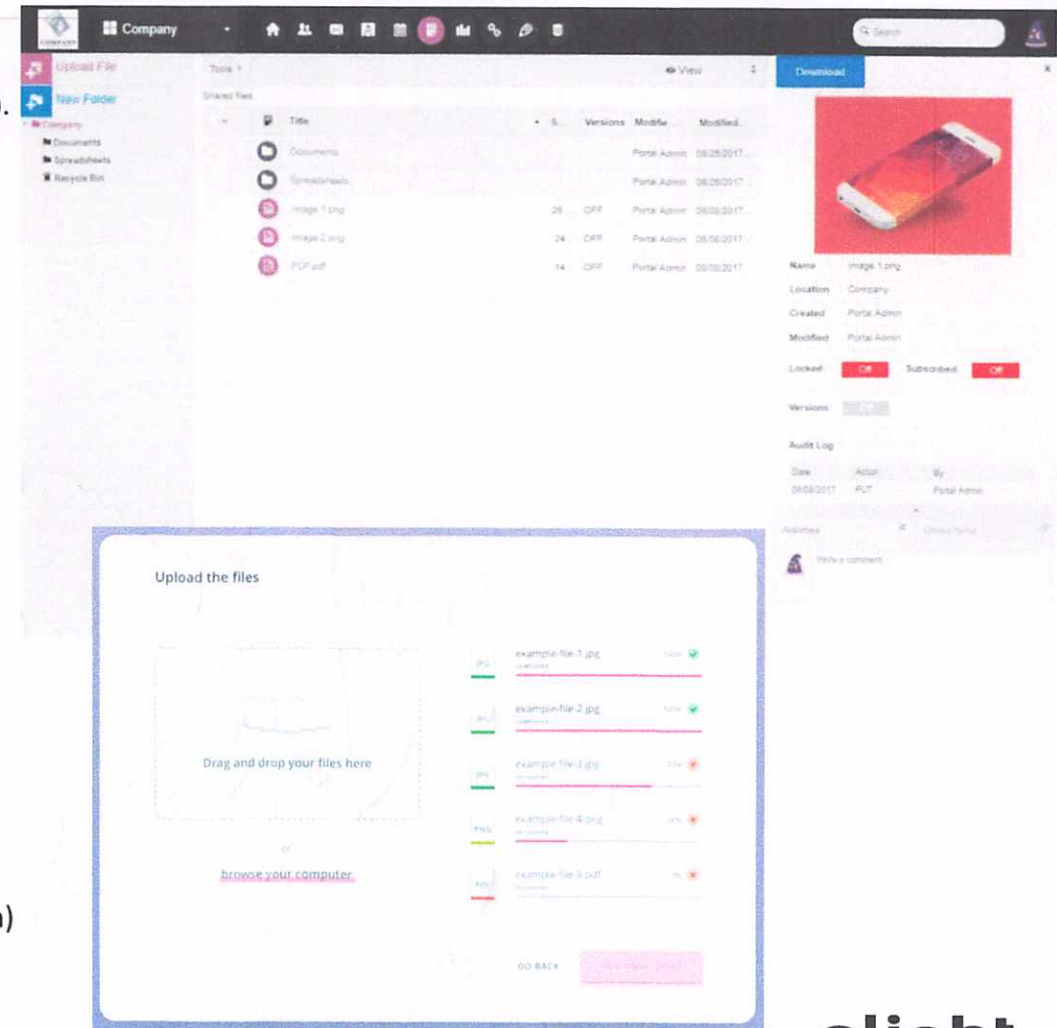

- The purpose of a tile is to provide insightful information to the end user without them having to open the rich application to obtain answers.
- Each tile should
 - Include minimal, but key information to the user
 - Be self-explanatory
 - Provide an option to “View Details” (links to module)
 - Provide the ability to drill down into numbers (links to module, filtered content)
 - Contain only data elements that are easily transferable to the Future Proposed view, so that any development effort is re-usable
 - Use only colors from Thrive design

- The purpose of a title is to provide initial information to the end user without them having to open the rich application to obtain answers.
- Each title should
 - include minimal, but key information to the user
 - Be self-explanatory
 - Provide an option to "View Details" (links to module)
 - Provide the split into numbers (links to module, filtered content)
 - Contain only data elements that are easily transferable to the future proposed view so that any development effort is reusable
 - Use only colors from Theme Designer

Document Store

- Documents stored and grouped in “folders” (folder = document types).
 - Follow Google logic; “Folders” dynamically created from tags;
Just a filter view, not a structure or static data
- Display basic information only e.g.
 - Doc. Name
 - Tax year, Period
 - Module / Origin
 - Uploaded date, Tag(s)
- Extended view for any row clicked upon and show
 - Preview
 - Document Name
 - Created (source/origin)
 - Retention Rules
 - Audit log (document upload event status)
 - Linked Items (e.g. payroll checklist)
- View / Download
- Manual upload
- Share (via Safebox + TSL)
- Add notes/comments (w/ option to tag users (from TSL) -> notification)
- Simple Filtering for ease of access
- Simple Drag and Drop file upload with validation/integrity checks

kind of conversation
 I have been
 trying to get
 a sense of
 what is going on
 in the world
 and how it
 affects us
 as individuals
 and as a society
 I am not sure
 if I am doing
 it right or not
 but I am trying
 to do my best
 to understand
 the world around
 me

Document 2016

Payroll and/or Tax Reconciliation

- Should get dumped into a compliance folder but not remain a common artifact for payroll. Needs to be an easy, super-simple view of the data

- Transform the SOC1 report (Excel report from euHReka), into a visually appealing, easy to understand overview e.g. (see image)
- Reconcile per pay period in a quick, easy, simple way
- Allow the client the option to electronically “sign-off” the payroll cycle
- Allow the user to drill down into each category by simply clicking on the total
- The more modules you have, the more data you see and can reconcile (e.g. the more boxes present in section B, in the image)**

Why?

- Is year end payroll and reconciliation and creation of W2s stressful?
 - Yes (100%)
 - No (0%)
- How often do you currently reconcile?
 - Per pay (20%) ← How many would do it here if it was EASY!
 - Monthly (20%)
 - Quarterly (60%)
 - Annually (0%)

2018 Financial Recap

A. Operating Revenues

B. Operating Expenses

C. Total Operating Profit (A - B)

\$2.7B

D. Total Nonoperating Expenses, Net

-\$772M

E. Pretax Income (C + D)

\$1.9B

F. Add back: Special Items, Net

+\$906M

G. Pretax Income, Excluding Special Items (E + F)

\$2.8B

H. Income Tax Provision (G x 24%)

-\$673M

I. Net Income, Excluding Special Items (G + H)

\$2.1B

J. GAAP Net Income

\$1.4B¹

¹We use pretax profit and net profit excluding special items (non-GAAP financial measures) to evaluate the company's performance. These measures are not intended to replace GAAP financial measures. GAAP financial measures may also provide useful information to investors. The GAAP measures may not be comparable to similarly named non-GAAP measures of other companies and should be considered in addition to, and not as a substitute for or superior to, any measure of performance, cash flow or liquidity prepared in accordance with GAAP.

Reconciliation to GAAP Net Income:
 E. Pretax Income: \$1.9B
 F. Income Tax Provision (E x 24%): -\$464M
 I. GAAP Net Income (E + F): \$1.4B

Funding and Money Movement

- Client approves funding request online
 - Tax
 - Garns
 - Net pay
 - Etc.
- Facilitates online money movement between client account and destination account(s)
- Drill down into source information/origin for more dtails

The screenshot displays the Alight dashboard interface. At the top, the 'Dashboard' title is followed by the subtitle 'Your balance and recent transactions at a glance'. A 'Download Statements' button is located in the top right corner. Below the header, there are three main action buttons: 'Convert & Pay', 'Collect or add funds', and 'Create mass payment'. A central callout box states 'Total funding amounts requested, funded'. Under the 'Balances' section, five currency cards are shown: EUR (100,000.00), GBP (100,000.00), USD (100,000.00), JPY (100,000), and CNY (100,000.00). A 'Show more' link is present below these cards. The 'Payments pending authorisation' section contains a table with the following data:

DATE	BENEFICIARY	SENT	PAYMENT DETAILS	FUNDING SOURCE	STATUS
20/09/2019	ABC Limited	GBP 170,000.00	PI0123456	EBPOTR1233456	Approved
20/09/2019	Company name Ltd.	GBP 170,000.00	PI0123456	GBP Balance	Approved

A callout box at the bottom right of the table states 'Client approved funding with a simple click'.

Payroll Compliance

- Visual representation of legislation changes and the number of employees potentially impacted by those changes
- Ability to push notify employees impacted of any upcoming changes
- Current content is stored in the client help center but does not cross reference the employee data
- Ease of access to legislative documentation

David M. (C) [Signature]

- Ease of access to legislative documentation
- Reference the employee data help center but does not cross
- Current content is stored in the client's database
- Impacted of any upcoming changes
- Ability to push notify employees
- Potentially impacted by those changes
- Changes and the number of employees
- Visual representation of legislation

Payroll Compliance

Reporting

What is the ask?

- **Real-time access to the data** being processed
- **Simple** (easy to understand), **actionable Insight** w/ the ability to drill down into the detail

As a compromise

- The ask is:
 - Delivery of simple, easy to understand reports
 - Real-time, ease of access to those reports that have already been produced
- The ask is not:
 - Adhoc reporting to the real-time, underlying (and maybe incomplete) data

Platform	Standard Reports Available	Quality of Reports
Overpayments	Yes	Content clean/consistent
Severance	Client specific Maybe some commonality but this is by chance, rather than design	Client specific requirements
Tax Filing	Reports from MasterTax	Difficult to understand, hard for clients to interpret
... (TBC)

How do we...

Statement	How
Help people do their best work	Consolidated, prioritized inbox (new)
Spark new possibilities	<u>AppStore</u> (new)
Illuminate new efficiencies	
Simplify how people work	Digital Workers (new)
Enhance how people live	Notifications to employees when data is missing; e.g. no time data, submit your timesheet (new) - Dailypay; Overview, Transparency; advanced payments
Reimagine how people and organizations thrive	
Commit to Excellence every day	- Stabilization; Quality; Zero Regression Eloise (anomaly detection) - IDB analysis / cross-client analysis (needs a front end - new) - Automated point of view assessment (to sell consulting) (new)
Provide people-centric service	
Connected	- HRIS Integration, Cloud Apps <u>Lisa</u>
Insightful	- hrX Analyze - Eloise

~ 95% ~~SLA~~ SLA

→ don't know or fail!

How do we...

Statement	How
Get to one solution (Dave/Katie/Christopher)	• Access to collaborate: Needs access to each others repositories/documentation • End user focused: Need to understand how the products work functionality before we merge together • Terminology: Standard set of terminology and FAQ across the tools • Knowledge exchange: Regular touchpoints to build knowledge • Authorization: Single method across all tools • User experience: Single UI across all tools • Integration: Single method across the suite (API based?). Functionally based. Is there a common tool we can use across all end points? • Shared use: of common components • Consistent: behavior/way of working across all tools
Deliver Common/Re-usable components (Dave)	• Define: The list of functionality available in each tool/module • Compare: Findings to document
Provide a Great Experience (Alan -> Carolyn, pending JB approval before proceeding)	• Useful: Content should be original and fulfill a need • Usable: Must be easy to use • Desirable: Image, identity, brand, and other design elements used to evoke emotion and appreciation • Findable: Content needs to be navigable and locatable onsite and offsite • Accessible: Content needs to be accessible to people with disabilities • Credible: Users must trust and believe what you tell them • Understanding: Well defined personas and user stories
Make functionality, services, digital workers, On demand (Stephane/Katie)	• Packaged: Technology Components bundled • Easily deployable: Cloud based e.g. account on AWS/Azure, activate new instance w/ click of a button (or as simple as this concept)
Implement Fast (Bart/Eric)	• Streamline technology components: Remove dependencies • Repeatable: Well defined and documented process • Automate vs. Offshore: Automate repeatable processes • Automate system deployment: See easily deployable, need to create visibility of progress (pipelines) • Configuration: Streamline, bundle, deliver golden solution / Easy to deviate (within reason) at client level, by client • Boomi Concept: Drag & drop configuration (of integrations from source to destination) • Sample data in TST/QAS: Accelerate testing

How do we...

Statement	How
Turn visitors into customers (Alan / Nikki)	• Immediately convey the value of the featured product (you never get a second change to make a first impression) • Show an understanding the problem • How to fix the problem • How Alight can resolve the problem
Deliver a single landing page across the combined suite (Alan -> Carolyn, pending JB approval before proceeding)	• Headline: What do I need to know? • Call to action: What do I need to do? • Simple navigation: To core content • Supporting imagery: Use images that capture emotion • Benefits: What is Alight doing to help / What has Alight done • Resources: How can Alight help you do more • Success Indicators: Data speaks louder than words, demonstrate our value
Provide service without the internet (Stephane)	• More and more dependency on cloud; What is the backup plan?

Turn Visitors into Customers (1/2)

- Immediately convey the value of the featured product / service (we never get a second chance to make a great *first* impression)
 - Show an understanding the problem
 - How to fix the problem
 - How Alight can resolve the problem
- Definition of a visitor
 - Potential customers viewing the website: Need compelling content (owner: marketing)
 - Existing customers looking for additional services: Need access to see what else they can buy.
 - Who? Director of Payroll, Director of HR, Leads, Administrators
 - How? Corporate website (owner: marketing). Existing product suite (owner: Products)

Problem #1

- Need to clearly articulate what we do: How to get to a one-pager summary
- Visually stimulating content that grabs the attention: What is the 15 second view of our technology that gives the “WOW” factor
 - Have to link this to the new UX + concept of “more you buy, exponentially increases value”
 - 1+1=3 dimensions of insight

Step 1 (Crawl):

- Get agreement on what we do / intend to do. Co-ordinate with Marketing.
- Look at existing services and determine what is “app-able” and not “app-able”

Step 2 (Walk):

- Deliver a golden standard with Client-configurable tools; easy to deploy, easy to implement
- Produce some “WOW” content to upsell the current solution

Step 3 (Run):

- Deliver on-demand

Challenges

- *Can we keep customers without a relationship?*
- *What keeps clients? Our people.*
- *Client executive, account manager,*

Opportunities for Lisa

- *Understand trends in case management and make pro-active recommendations on how we can help*
- *What are the questions coming through Lisa (even if we are not providing services, the payroll related cases would be logged)*
- *How to assess all cases from all system?*
- *Proactively reach out*

alight

Turn Visitors into Customers (2/2)

Implement Live Chat

- Consumers love it because they can get their questions answered almost immediately, with minimum hassle
- Companies love it because it's so cost-effective
- create "triggers" that will initiate the conversation with a customer when their activity signals they're having a problem

Offer Something for Free

- If your business is built on a subscription model, offering a freebie could be precisely what's needed to give your visitors the confidence to become customers.
- A free trial achieves two things:
 - Answers those questions that a customer might not think to ask, but that are preventing them from buying.
 - Demonstrates the confidence you have in your product or service – a confidence that will rub off on potential customers.
- Canceling should always be quick, easy, and pain free.
- A willingness to offer a free trial without even requiring card details shows the ultimate confidence in your product.
- When a customer ends their free trial, or becomes a paying customer but leaves a short while later, ask them **why**, and – where possible – make changes that address their concerns

Implement Signs of Social Proof

- People like to follow the herd. If they think plenty of other people are buying your product, they're more likely to do so as well.
- Testimonials are an excellent form of social proof
- In B2B companies, displaying the logos of your current clients shows potential new clients that they'll be in good company.
- If the numbers are impressive enough, simply displaying how many people have bought your product or signed-up for your service can be enough to push the odds in your favor.

Create Product Demo Videos

- "the single most important part of any product page is the product image,"
- product *videos* have been shown to **increase the chance a customer will buy by anywhere between 64% and 85%**
- Show the product from every angle and make sure to highlight its best features. Where possible, don't just show the product – employ someone to actually be in the video and talk the customer through the product

Leverage Your Visitor's FOMO

- There are lots of reasons a customer might choose not to buy, but a big one is because they tell themselves, "I'll do it later."
- The problem is that – a lot of the time – later never comes.
- We simply need to show the customer that if they don't complete their purchase **now**, they might miss out on the chance to complete their purchase **at all**, (or, at least, at that price).

Implement an Exit Overlay

- Exit overlays, or exit intent popups, are those messages that pop up as you try to leave a website.
 - Grow contact list
 - Raise awareness (e.g. client help center)
 - Offer a trial / something for free

Track Your Visitor's Movements

- Using a tool like CrazyEgg to track how your visitors move around your website – primarily, what they click on and what they ignore.
- Visualize the data using heat maps

of

Intro

- Forget everything you knew about yesterdays payroll
- Imagine a cloud platform powered by robots that run your payroll
- An intelligent virtual assistant that you can delegate to; that prompts you when needed
- Your managers complete hirings, terminations, and time-sheet approvals
- Workers select their benefits
- RPA Payroll runs in real-time and as often as needed
- Your workers get full transparency and accessibility to their payments, ay any time
- You approve your final payroll and sit back whilst money movement initiates payments
- Payroll ready on the first day of the cycle; Check payroll from mobile and desktop, 24/7
- Virtual payroll assistant verify and correct errors in real-time for 100% accuracy
- On-demand control over your payroll

Onion + DailyPay: Self-driving payroll

Empowers employees to achieve financial security by giving workers control over the timing of their pay. This allows employees to pay bills on time, avoid late fees and replaces the need for expensive payday loans or overdraft fees. The result is a meaningful impact on recruiting, retention and employee satisfaction

Think Different

- We need to do something different; something frictionless
- Address the 2 types of employees in our client organizations
 - Employees that require income now
 - Want to be paid today; not tomorrow, not at the end of the month, not on the 15th of the month; Today
 - 87% of people in the workforce
 - Employees living paycheck to paycheck
 - Millennials and Gen Z who get instant everything
 - Grew up in a digitally native world
 - Everything happens in an instant; instant cars, instant food, instant service
 - If no instant access to the funds that they've earned, you — as an employer — are screwing up

Self-driving payroll

- **Increases transparency and provides immediate access into earned wages**
 - When an employee can see what they've earned, they make smarter decisions
 - Drives employees to reach their objectives, gives them instant gratification for their work
 - Leads to increased productivity
- **Increases talent acquisition**
 - Let employees know they are paid daily
- **Reduce turnover**
 - Earn \$10 per hour and get paid daily?
 - Earn \$12 per hour and get paid every two weeks?
 - Hourly employees will prefer to stay daily paid for less; 71% reduced turnover
 - People will stay when you give them access to their money; the employee led experience
- **Reduction In fraud**
 - Instant access to earned wages reduces the need to commit theft or fraud out of desperation; reduced by 95%
 - When given access to their own money, the majority would prefer to use their own money

Considerations

- Financial security starts with transparency
- Avoiding one NSF (non-sufficient funds fee) can stop a \$437 landslide
- Compliance and legislation matter. A LOT.
- 50% of anything is never enough
 - Getting employees paychecks when you feel like it is never enough!
 - Giving them access to the funds half way through the month is never enough
 - Giving them access to half of their wages, is never enough

Transparency to see how much you've earned and accessibility to obtain those funds if you want to, allows us to move into a world where we can all THRIVE!

A complete pay experience solution that helps employees access cash to pay bills and build financial wellness

Gives employees instant access to their pay. Worked eight hours on a Tuesday? Get paid right after your shift on the same day.

Start Transfer

Transferred Early
Current pay period: Mon, Nov 11 - Sun, Nov 17

\$100.00

Employees can instantly access their earned pay for \$2.99 per transfer. Employees receive funds on the next business day for \$1.99 per transfer. You choose who pays the fee: you, your employees or a combination of the two

Over 60% of today's workforce is unsure about their ability to handle economic uncertainty. Bills, rent and emergencies don't always coincide with traditional pay periods. PAY eliminates the uncertainty associated with a paycheck and gives employees access to pay and tips when they need it, and the ability to plan — before payday arrives. We reduce financial stress and increase financial stability.

Complete Transfer
On payday, you'll receive all your savings into your selected savings account ending in 1234

Savings on Payday
Current pay period: Mon, Nov 11 - Sun, Nov 17

\$31.00

Auto-save: Build a savings safety net with regularly scheduled savings.
Direct-save: Save different amounts each pay period, on-demand, at any time.
Roundup-save: Save before you spend. Allocate earnings to savings when a PAY transfer is requested.

78% of working Americans are searching for cost-free ways to help them save. **SAVE** encourages employees to save by offering three ways to set aside their earnings, before payday, and start building a savings safety net. **SAVE** is completely free, and it enhances the employer experience in a powerful way.

Three ways to save ensure that any employee has the tools to start the habit of saving. Want to take a pay advance? Put part of it in your personal savings account.

A complete pay experience solution that helps employees access cash to pay bills and build financial wellness

Your Employer Sent You an Off-Cycle Payment

CYCLE

\$93

This payment was sent automatically to the primary bank account ending in 1234

Note from Payroll
Payroll correction responding to pay period ending 8/11/2019

[Go to Dashboard](#)

Making exceptions or one-off payments or distributing non-cash tips before payday can be a hassle for payroll. With **CYCLE**, you don't have to issue checks and send them out overnight. You can do it all with ease through **CYCLE** and have a payment sent electronically to any employee account instantly.

Disburse payments when you need to, instantly and digitally.

Send funds to any account or pay card.

Save time and the cost of paper checks and shipping fees.

Woohoo! You Got a Bonus!

REWARD

\$20

This bonus appears in your available balance

Note from Manager: John Doe
Thank you so much for picking up an extra shift last minute yesterday. Really appreciate it!

[Go to Dashboard](#)

Managers have a real-time way to motivate workers and fill shifts.

The ability to receive instant rewards inspires employees to perform their best.

Payments are reported back to payroll via a reporting dashboard enabling you to ensure tax compliance.

Keeping employees happy, engaged and motivated is a top priority for managers. **REWARD** empowers managers to recognize employees for a job well done, incentivizes employees to pick up additional shifts and creates a positive pay experience.

Allows employers to make off-cycle payments. Have an employee who's leaving the company? Easily disburse their final paycheck.

Enables employers to send spot payments and company-paid incentives to their employees. Want to reward outstanding performance or fill an undesirable shift? Send out a bonus.

Improving Payroll with AI & Analytics

“Most of the things a human can do in less than a second, machine learning is more accurate at”

“AI will be payroll’s helping hand”

“Be informed, not alarmed”

Digital Workers

- Sell subscriptions to our tools (e.g. Overpayments) to drive ARR
 - Sell tool + services (digital workers incl. by default)
 - Sell tool + N digital workers (w/ option to subscribe to more)
 - Sell tool only (w/ option to subscribe to digital workers)
- Create Digital Workers related specifically to a tool, e.g. Overpayments
 - Digital Worker for each type of process (repeatable work that a lot of clients need)
 - Automate the process and package as a digital worker
 - Provide a consulting option where non-standard processes can be packaged as a digital worker
- Digital Worker Store
 - Create an “app store” of all digital workers available based on tool subscription
 - Client can activate/install/subscribe to workers from the store (no config!)
- Digital Workers fully integrated w/ Lisa
 - Ask Lisa to kick off a process; Lisa co-ordinates and prioritizes the workload

bioflow and sedimenting has attributed to soil erosion. The risk of soil loss

1. What is the purpose of the study?

Digital Workers

Who will Lisa be when she grows up?

- A personal assistant for anyone in HR or Payroll
 - Data management and filing
 - Screening inquiries and requests, and handling them when appropriate
 - Dealing with incoming correspondence on behalf of the manager
 - Carrying out background research and presenting findings
 - Producing documents, briefing papers, reports and presentations
 - Ensuring the manager is well prepared for meetings through key data points
 - A key part of the decision making process
 - Creates reports to provide updates on company progress
 - Better decision-making capabilities due to data-backed insights and forecasts
 - Faster induction/relieving of employees into organization's payroll system on entry/exit
- A compliance officer
 - Identifies fraudulent activity / regulations which the business needs to adhere to.
- A team lead for digital workers
 - Provides direction, instructions and guidance to a digital workers
 - Monitors the performance and prioritizes the work of digital workers
 - Distributes the results of digital workers to appropriate personnel (link to TSL?)
- Best friend of Eloise
 - Pro-actively presents personalized findings of Eloise to Retained Payroll
- Best friend of *<insert external chatbot>*
 - User should only need to work with one chatbot; Either Lisa as the entry point or as the recipient

Eloise: Payroll AI

- Anomalies in pay results
- Anomalies in master data (reconciliation between HCM:Payroll)
- Validate difference in pay vs. data changes received
- Identify missing, or potentially erroneous data
 - Tax Form wasn't provided (provide an option to request the data from ...)
 - Tax data inconsistent with the norm for that demographic
- Compliance
 - Scan upcoming changes and identify those employees who may be impacted
 - Offer to send communications to those employees to warn of changes
- Eliminate human error and delays
- Scan interfaces received to highlight missing/inconsistent files
- Verifies all payroll artifacts uploaded into PPM
- Pro-active communication through Lisa
- End to end assistance ("the Russell")

Analytics

- Dashboards; Crawl, Walk, Run, Fly (is all AMS work, but could package)
 - Can Lisa assess the data used most often and suggest dashboards (based on pre-defined parameters)
- Benchmarking; Aggregate client comparisons
- Recommendations based on the data (to sell consulting)
- Analytics
 - Strategic/Executive
 - Analytical/Tactical
 - Operational
 - Blend elements of this together
- Monetize the data
 - Collect data that we may not today be collecting; connect to other platforms e.g. Google to inherit data (security first...)
- Use the Mint concept
 - Manage all of your data in one place; Link different datasources from certified vendors through secure authentication
 - API exchanges to provide a centralized overview of data in a consistent data model
 - Single overview of all **key** data within the HR landscape; don't try and do it all, focus on insightful and relevant data only
- Different needs/requirements depending on region e.g. Asia use is all, EU GDPR

Roadmap

alight

L-Alight Tools Roadmap

Tool	Now (Upto-6 months)	Future (6-12 months)	Ideation / Parked items
Eloise	- Eloise MVP is live - Tax withholding is live - Isolation forest live on the ML framework	Build ML Framework for 3 algorithms	- Input anomaly detection and correction: Actively prevent "bad" data entries and provide recommendations for autocorrecting. Also tracking and pushing text notifications for approvals. - Automated digital checklist: Provide a digital payroll processing checklist to assist with timeliness and accuracy, as well as a dashboard with macro-level data analysis and insights. - Payee anomaly detection and correction/transaction ability: Allow employees to review and edit their paycheck details before they are finalized and push text notifications to employees regarding missing or incomplete information.
IVA / Lisa	Enhance Intents to incorporate more HCM/Payroll content	- Continue enhancements of intents to incorporate more HCM/Payroll content - Create Transaction capability	
Benefit Payment Services (BPS)	Actively procuring prospective client (project SOX) that would bring (Timing dependent on the SOX deal) Employer Portal (possibly using HCM Connect, myHR, BOUI functionality) Updated Employee Portal (possible using HCM Connect) Canada Instance of all US work Addition of Customer Care (for clients that do not have TBA as administrators)		Once updated Portals are rolled out to new client we would update all current clients with new functionality Platform upgrade – new version of PS (2021)

L-Alight Tools Roadmap

Tool	Now (Upto-6 months)	Future (6-12 months)	Ideation / Parked items
O2 Mass Load Tool			• Need something similar for Oracle & SF. • Opportunity for scalability • Possible future vision to revise security roles
O2 Severance Tool			• Add WCP skin • Scalable process // create templated and POV driven implementation starting point • **Keep eye on platforms and their roadmaps so as not to duplicate
O2 Overpayment Tool		Employee self-service for overpayment calculations, payment history, online payment gateway to facilitate credit/debit card payments (August)	• Complete product integration with SAP • Integrate with customer portal • Look to scale to lower volume OP clients. • Potential for productizing // WCP skin (stand alone product possible) • Client facing component - payback via credit card (in progress) • Building for SAP clients
O2 HCM Connect	• In Progress - Project scope phase 1 – Link to CS tooling • Initial Client: ✓ OLG – March 2020 ✓ Hartford – June 2020	Project scope phase 2 – Link to other HCM Alight tools	• Opportunity for WGL client – add eGain functionality within Portal • Opportunity to support mid-market HCM clients that need WebChat and eService-type integration • Opportunity for State Street Bank (SSB) • Opportunity to serve as employer portal for Project SOX (BPS) Ideas • Admin / SSO Configuration • UDP Connection • Incorporate Standalone Authentication (currently SSO only) • Bulk user uploads • Additional configurations from Admin screen • Role management • Terminated / pre-hire access • IVA Chat • Multi themes • Opportunity to link to other HCM Alight tools per client need • Opportunity to serve as landing page for services such as TFSS, AGT, etc.
O2 LOA		Initial tool creation on O2 platform to support Marriott	

L-Alight Tools Roadmap

Tool	Now (Upto-6 months)	Future (6-12 months)	Ideation / Parked items
Alight Garnishment Tool (AGT)	Build Optical Character Recognition(OCR) - phase 1 currently in progress (Feb 28, 2020) to scan and update fields on the inbound documents received into the imaging system via fax or batch process.	AGT Rebuild to remove dependence on Liferay utilizing basic JAVA and ExtJS software.	- AGT rewrite (due to Liferay going out of support - has to move by Sept 2020) → has been extended - OCR enhancements – - Phase 2 - apply the same functionality to our Document Upload portal within AGT to reduce make client doc upload more efficient. - Phase 3 - Incorporate Wipro Holmes tool into process for further automation - Machine Learning - Progress to offer third party payments more generally - Progress the API build for SAP - Portal enhancements continued (no specific roadmap)
HR Analyzer	- Run HR Analyzer through PDLC - Obtain 80% adoption for hrX Analyze - Deploy Alight analytics offering	- Build case data in hrX Analyze - Build strategy for "Prediction Machine"	Need to look at HR Analyzer + LVMS + Olympus (MILO) + hrX Analyze
TFSS Portal	Phase 1 - Internal capability between Wipro and Alight to enable reports/checklists online - efficiencies – March 2020	Phase 2 - , CRM component in IDB & Client facing portal - reports, funding requests, etc. → Keep Competitive need. – Intended by end of Q4 2020	Currently in initial design and creation
